

An underwater photograph of a coral reef. The water is a deep blue-green color. In the foreground, there are large, dark, rounded coral structures. A small, dark fish is visible swimming in the middle ground. The background shows more coral and the surface of the water with some light reflecting off it.

**ARTIFICIAL
INTELLIGENCE
IS BLEEDING
YOU & YOUR
OCEANS DRY**

HARMS OF AI

- Coastal data centers draw water directly from local rivers to cool their servers
 - **STRESSING** native fish populations and **REDUCING** dissolved oxygen levels
- Massive factory ships use AI to harvest marine life
 - **DEplete** already overfished populations

SOLUTIONS

- Lessen AI use
- Tell others in your community to limit use
- Urge your local govt to take action against AI usage
- Shorten conversations with AI.
- Delete old chats so that tech companies don't have to waste energy storing them.
- Limit image and video creation.

ACKNOWLEDGMENTS

- AI is a major part of everything
- In work, school, and day to day life
- Avoiding it may seem impossible
- Multiple small actions = one large action

BETTER TO
TAKE
IMPERFECT
ACTION OVER
INACTION
